DETAILED ACTION

Double Patenting

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 2, 4-5, 9, 11-12, 16 and 18-19 provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 22-24 of copending Application No. 10/982,889(US-2005/0083288A1). Although the conflicting claims are not identical, they are not patentably distinct from each other because they both claim a liquid crystal display comprising: a ferroelectric liquid crystal material which is held between a pair of electrode substrates and whose optical response is asymmetric with respect to the polarity of a voltage applied; a signal applying section which applies an image signal to a pixel of the liquid crystal material for every three or more fields; and a polarity controller which reverses the polarity of the image signal in one frame period, wherein the polarity controller being configured to apply the image signal of a first polarity(positive) of each field in a first one of two

Art Unit: 2673

successive periods obtained by dividing the frame period, and to apply the image signal of a second polarity opposite(negative) to the first polarity(positive) and of fixed amplitudes being applied for each subsequent field in a second one of the two successive periods and the amplitude of the image signal for the last field that depends on the amplitude of image signal for the next frame.(see claims 22-24).

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

3. Claims 6-7, 13-14 and 20-21 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 22-24 of copending Application No. 10/982,889 in view Kuribayashi et al(4,709,995),

The copending application(claims 22-24) fail to disclose fields having different time lengths.

Kuribayashi et al teach a ferroelectric liquid crystal display having a plurality of fields having different time lengths(see figures 3, 6; abstract; column 5, lines 39-68 and column 1-23). It would have been obvious to have modified Asao et al as modified with the teaching of the copending application, so as to provide different levels of grayscale on a display.

Response to Arguments

4. Applicant's arguments with respect to claims 2, 4-7, 9, 11-14, 16 and 18-21 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
